DL

DETAILED ACTION

1. Claims 1 – 17 are presented for examination.

Response to Arguments

2. Applicant's arguments, see Appeal Brief, filed 10/17/2006, with respect to the rejection(s) of claim(s) 1-17 under 101 and 103 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of U.S. Patents 6,925,593 & 6,850,956.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 2143

4. Claims 1, 7, 11 and 16 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 4, 7 and 14 of U.S. Patent No. 6,925,593 (hereinafter '593'). Although the conflicting claims are not identical, they are not patentably distinct from each other because the limitation of "automatically initiating execution of said project definition in response to a change to said image data in said data source" is not specifically present in '593'. It would have been obvious to one of ordinary skill in the art at the time the inventions were made to automatically initiate an execution of data since it has been held that broadly providing a mechanical or automatic means to replace manual activity which has accomplished the same result involves only routine skill in the art. *In re Venner*, 120 USPQ 192.

5. Claims 1, 7, 11 and 16 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 8, 13 and 20 of U.S. Patent No. 6,850,956 (hereinafter '956'). Although the conflicting claims are not identical, they are not patentably distinct from each other because the limitation of "automatically initiating execution of said project definition in response to a change to said image data in said data source" is not specifically present in '956'. It would have been obvious to one of ordinary skill in the art at the time the inventions were made to automatically initiate an execution of data since it has been held that broadly providing a mechanical or automatic means to replace manual activity which has accomplished the same result involves only routine skill in the art. *In re Venner*, 120 USPQ 192.

6. All other claims are rejected for similar reasons stated above and their dependency on the above claims.
